Visvesvaraya Technological University, Bangalore, India
High Distinction achieved

ACADEMIC PROJECTS

Title: Build a website for job portal **Feb 2013**
Objective: To create a customer friendly online job portal to connect recruiters and job seekers
Tools: React, NodeJS, Express, MongoDB/GoogleCloud
Duties: In a group of 3 my duty involved writing the backend code and script for the website, testing them and writing a report. We built a website to post advertisements where we used ReactJS for the UI. NodeJS and Express were used for middleware and backend and MongoDB for the database while on development and we used Google Cloud for the final development.
Outcome: Achieved a Distinction

ACHIEVEMENTS/AWARDS

- Developed and published an app named **"Nidhi -The Browser"** in Google Play Store Nidhi - The Browser – Apps on Google Play.
- Completed **Goldman Sachs Engineering-Virtual-Program** and learned about password database attack, hashing, encryption, and decryption.
- Completed **JPMorgan Chase Software Engineering Virtual Experience**, which was about displaying data graphically, use of react and node.js, use of git repository and its management.
